International Application 150.: PCT/EP99/03822 Attorney Docket No.: BM45324

09/701711

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Vinals-Bassols

Serial No.: Unknown Filed: Herewith

Group Art Unit No.: Unknown

Examiner: Unknown

For: BASB027 Proteins and Genes from Moraxella Catarrhalis, Antigens, Antibodies, and

Uses

## PRELIMINARY AMENDMENT

Sir:

Please enter this Preliminary Amendment into the record of the above-identified patent application before the calculation of fees.

## In the Claims:

Please delete the claims of the application as filed in the PCT and substitute therefor:

28 An isolated polypeptide comprising a member selected from the group consisting of

- an amino acid sequence which has at least 90% identity to SEQ ID NOs:2 or 4; (a)
- an immunogenic fragment of the amino acid sequence of (a), wherein the (b) immunogenic fragment is at least 90% identical to an aligned contiguous segment of SEQ ID NOs:2 or 4; and
- an immunogenic fragment of the amino acid sequence of (a) that matches an (c) aligned contiguous segment of SEQ ID NOs:2 or 4with no more than five single amino acid substitutions, deletions or additions;

wherein the isolated polypeptide, when administered to a subject in a suitable composition which can include an adjuvant, or a suitable carrier coupled to the polypeptide, induces an immune response that recognizes a polypeptide having the sequence of SEQ ID NOs:2 or 4.

- The isolated polypeptide of claim 27, wherein the immune response recognizes an 28. antigen having molecular weight 95 kD (by SDS PAGE) in Moraxella catarrhalis strains Mc 2904, 2913, 2926, 2931, 2956, 2960, 2969, and 2975.
- The isolated polypeptide of claim 27, wherein the immunogenix fragment of (b) 29. comprises at least 15 amino acids.
